Dear Jim, Eason 6/10/75

I have not had response from Garry Wills. Because I sent this letter to him via the WxStar it may have been delayed reaching him. He may or may not respond. But I feel he should have time.

And I want whatever he can say to address because it is not at all as he wrote.

Please return when you are finished.

I have no more copies of the transcript involved. I think you can get it easiest from the GPO bookstore in SF. It is in the Congressional Record of 5/14/75, an "extension of remarks" by Cong. Gladys Spellman.

You may want to read parts on the air. The transcript was not made by the original stenotypist so there are minor errors, like "experimental" for "supplemental." The Q usually refers to the member previously identified. A can be Warren or Rankin. It is possible to determine from context.

Sorry I have no copies of the affidavit I've filed charging the FBI with perjury.

I'm preparing a follow-up to be filed as soon as possible.

It will address with evidence, including "new evidence," the intent to rewrite the law in the courts again.

Best.
